

APRIL 2022

# Provider News

For participating physicians, dentists, other health care professionals and facilities

## National Healthcare Decisions Day

National Healthcare Decisions Day, observed annually on April 16, aims to inspire, educate and empower all of us to share our preferences for medical treatment should an unexpected illness occur.

The COVID-19 pandemic has collectively taught our communities that life, and our individual health, cannot always be predicted. Despite this fact, there are steps you can take to ensure your patients stay in control of their health at every stage of their care journey.

We encourage you to begin or continue advance care planning (ACP) conversations with all your patients as part of the preventive and treatment services you provide. We reimburse providers who bill for ACP conversations with members, regardless of age or health status.

ACP conversations may include:

- Designating a medical decision-maker
- Discussing current medical status and prognosis
- Discussing important personal elements that often influence treatment choices (e.g., personal values, social, cultural and spiritual beliefs)
- Reviewing, editing or creating documents, such as an advance directive, durable power of attorney or POLST/MOLST form

## About Provider News

This publication includes important news, as well as notices we are contractually required to communicate to you, including updates to our policies (medical, dental, reimbursement, medication) and pre-authorization lists. In the table of contents, this symbol indicates articles that include critical updates: ■. To save you time, you can click on the titles to go directly to specific articles. You can also return to the table of contents from any page by clicking on the link at the bottom of each page.

*Provider News* includes information for BridgeSpan Health in Idaho, Oregon, Utah and Washington. When information does not apply to all four states, the article will identify the state(s) to which that specific information applies.

Issues are published on the first day of the following months: February, April, June, August, October and December.

The information in this newsletter does not guarantee coverage. Verify members' eligibility and benefits via Availity Essentials at **availity.com**.

### The Bulletin

We publish a monthly bulletin as a supplement to this bimonthly provider newsletter. *The Bulletin* provides you with updates to medical and reimbursement policies, including changes we are contractually required to communicate to you.

### Share your feedback

If you have additional comments about our newsletter or bulletin, please send us an email at **provider\_communications@bridgespanhealth.com**.

## Fragmented/split billing claim submission reminder

We require all professional services rendered by the same provider for the same date of service to be submitted on one claim form.

Home infusion providers who bill for the initial and subsequent therapy administration code on the same day using modifier SH or SJ are excluded from this requirement.

We do not accept fragmented or split professional billing (i.e., services rendered by the same provider for the same date of service and submitted on multiple professional claim forms).

## Update your directory information

Accurate provider directories are essential for members to make informed health care decisions. When information is missing or inaccurate, members may be denied care or receive unexpected medical bills. The Consolidated Appropriations Act (CAA), 2021, requires health plans to establish a process to verify and update provider directory information no less frequently than every 90 days. Accurate provider directories are also a requirement for compliance with the Centers for Medicare & Medicaid Services (CMS), the Affordable Care Act (ACA) and your participation as a network provider with BridgeSpan.

Our *Provider Directory Attestation Requirements for Providers* policy requires:

- Providers to review to verify accuracy and submit all updated information about their practice at least every 90 days
- Providers to continue to notify us promptly of changes to directory information
- All participating providers who are eligible to display in directories based on their specialty and current credentialing status to be displayed in our provider directories
- All participating providers to comply with our policies and procedures related to furnishing information necessary to ensure provider directories are up-to-date, accurate and complete pursuant to federal and state law, including 45 C.F.R. 156.230(b); this information includes, but is not limited to, accepting new patients, provider practice location, contact information, specialty, medical group and other institutional affiliations
- Providers to review, update and return roster validation requests

Learn more about our *Provider Directory Attestation Requirements for Providers* policy and validating directory content on our provider website: [Contact Us> Update Your Information](#).

## Upcoming code pair edit

Effective for dates of service on and after July 1, 2022, we will implement Change Healthcare's bundling edits for outpatient facilities. These outpatient code pairs will be used to supplement the CMS Outpatient Code Editor Correct Coding Initiative (OCE CCI) code pairs. These code pairs are proprietary to Change Healthcare and, therefore, we cannot publish details about them.

Read more about ClaimsXten-sourced edits on our provider website: [Claims & Payment>Coding Toolkit](#).

## Administrative Manual updates

The following updates were made to our manual on April 1, 2022:

### Facility Guidelines

- Clarified that if a member under observation meets the inpatient level-of-care standard, the provider will be reimbursed for inpatient care for the entire length of stay
- **Oregon only:** Clarified that providers should keep waivers for deluxe products and submit HCPCS S1001 on a separate claim line

### Risk Adjustment

- Added information about provider education

Our manual sections are available on our provider website: [Library>Administrative Manual](#).

## Protect your Social Security number

The Transparency in Coverage (TIC) Final Rule, effective January 1, 2022, requires payers to provide members with a self-service cost-sharing estimator tool that displays personalized estimates based on the member's coverage. It also requires payers to publicly disclose, in machine-readable files:

- In-network negotiated rates for all covered items and services.
- Allowed amounts for out-of-network providers and pharmacies.
- Prescription drug pricing for in-network pharmacies.

Under TIC, providers' billing identification must be disclosed. **If you are using your Social Security number (SSN) as your provider number for billing purposes, and do not have a National Provider Identifier (NPI), this information will be publicly available.**

We strongly encourage you to apply for a tax ID or employer identification number (EIN) and promptly send this information to us.

- Request a tax ID or EIN on the IRS website: [irs-gov-taxid.com](https://www.irs.gov/taxid).
- Notify us of the change by calling our Provider Contact Center at 1 (855) 522-8894.

As a reminder, while BridgeSpan must disclose negotiated reimbursement rates under this rule, our reimbursement schedules remain confidential and proprietary. Participating providers should not disclose this information to others.

# Availity Essentials tips for estimating patient costs

Use the patient cost estimator (PCE) tool in Availity Essentials, to quickly generate an estimate of professional medical and dental services for your patients. The PCE uses a combination of member eligibility, benefits and provider network pricing to create the estimate for a specific treatment or service for a specific member. You can access the patient cost estimator by submitting an eligibility and benefits request. On the results page, a Patient Cost Estimator button will display when the service is available for that member.

## PCE button does not display

If you do not see the **Patient Cost Estimator** button, check the following:

- Your tax ID was included in the eligibility search.
- The current date was used in the **As of Date** box.
- Your patient is eligible for the treatment or service.

## Error messages

| Message  | Reason for error  |
|--|---|
| We cannot provide an automated cost estimate for the information entered. This service requires review upon claim submission. For additional information prior to claims processing, please refer to your fee schedule and/or the member's benefits. | One or more of the procedure codes you entered triggers a pend flag in our claims system. When that happens, it means the claim would normally be pended for manual review, so a real-time estimate cannot be returned. |
| Patient Cost Estimates are not currently available due to a technical issue with the payer. Please try again later.  | You may have encountered a service disruption or a timeout issue when you ran the transaction. Retry the transaction after an hour.   |
| We are unable to reach the payer at this time. Please try again later. Response ID:  |   |

## Other errors troubleshooting tips

- Check whether the combination of place of service (POS), procedure codes and modifiers are being submitted correctly. Correct billing guidelines are available on our provider website: [Claims & Payment>Claims Submission](#).
- If you are submitting a dental PCE, you must include the specific tooth or an oral cavity (OC) code, which is determined by the procedure code. The PCE screen includes a document of procedure codes that require an OC code.

- If you receive an Authorization Required or Authorization Unknown message in the PCE results, click the **Request Authorization** button to be routed to the authorization tool. Patient information from the PCE will be prepopulated in the authorization form.

## Get trained for free

View the training options available by clicking the Help & Training link in the Availity Essentials menu.

Learn more about the PCE on our provider website: [Programs>Medical Management>Member Programs](#).

Look for the next *Availity tips for reimbursement schedules* article in our June 2022 newsletter.

# Submit claims appeals in Availity Essentials starting in May

Beginning in May 2022, you will be able to use the new appeals tool in Availity Essentials to submit appeals.

- The new tool will streamline the appeals process, making it faster and easier to submit appeals directly from Availity Essentials.
- Instead of having to manually complete and submit a separate *Provider Appeal Form*, portal users will be able to submit an appeal with required documentation directly from the Claim Status screen, receive immediate confirmation of submission and review the progress of their appeal all in one place.

The appeals dashboard will show the status of submitted appeals. Access it from Availity Essentials: [Claims & Payments>Appeals](#).

## Get trained for free

View the training options available by clicking the Help & Training link in the Availity Essentials menu.

Look for announcements about the appeals tool launch on our provider website and Availity Essentials.

# Leading the way in pre-authorization transformation

Pre-authorization is a process that examines the safety, efficacy, quality and cost-efficiency of proposed services or treatments, helping to ensure members receive evidence-based and necessary care. Intended as a safety and cost-saving measure, the process increases treatment wait times for our members and administrative burden for providers.

This year, we seek to fundamentally transform the pre-authorization process. By integrating technology, provider partnerships and data automation, our goal is to reduce costs and administrative burden for providers while increasing transparency to promote timely care for our members. We will be able to selectively apply pre-authorization requirements for services—and remove requirements for services that are always approved.

We strive to be the industry leader of pre-authorization transformation by using technology and several responsive pre-authorization and auto-authorization programs to improve the experience for our members and providers, including:

- Transitioning from fax to electronic medical records (EMRs)
- Workflow automation
- Artificial intelligence (AI) predictive power to reduce administrative burden and make faster decisions based on prior services rendered

## Fax to EMR

Our goal is to shift from the traditional way of submitting pre-authorization requests using fax to electronic tools for submission and authorization, including those we currently offer providers through Availity Essentials: Real-time, electronic pre-authorization (eAuth) and automated pre-authorization via MCG Health's (MCG) Cite AutoAuth. Fax to EMR-based pre-authorization submissions will significantly improve the efficiency, efficacy and timeliness of the pre-authorization process.

## Workflow automation

Later this year we will implement workflow automation to improve pre-authorization approval times through providers' EMRs. EMR integration uses the providers' current workflows so they don't have to access a separate tool for pre-authorization submissions. Additionally, EMR integration allows auto population of fields and clinical requirements for streamlined submissions and reviews resulting in faster pre-authorization determinations. Pre-authorization determinations can be displayed on a dashboard available in the EMR.

## Artificial intelligence (AI) predictive power

We are using AI to determine whether a pre-authorization request should be automatically approved with little or no human interaction for medical treatments.

We developed machine-learning models and automated business rules (ABRE) from thousands of historical pre-authorization cases to identify patterns in required criteria for approval, evaluate those patterns in the current request, and predict the appropriateness for a future requested services when a pre-authorization request is received, yielding an automatic decision. When criteria are met, the models predict whether a request should be approved and can return a decision to providers in minutes. AI allows for faster pre-authorization approval because it no longer needs a clinician to review each request: If the workflow determines the criteria are met, the request is approved immediately. **Note:** AI will never deny a request; if medical criteria are not met in the workflow, the request is pending for clinician review.

Our AI assistant is now providing a suggested determination (approve or pend) for the first of our medical policies to go through this process:

- *Oxygen Concentrators (#DME91)*
- *Transcranial Magnetic Stimulation as a Treatment of Depression and Other Disorders (#MED148)*
- *Endometrial Ablation (#SUR01)*
- *Genetic Testing for Hereditary Breast and Ovarian Cancer and Li-Fraumeni Syndrome (#GT02)*

You can take advantage of our AI-powered predictive pre-authorization now when you request authorization for these services through Availity Essentials' electronic authorization tool or MCG Health's (MCG) Cite AutoAuth. More medical policies will be added to the AI model over the coming months.

We believe that by being leaders in pre-authorization transformation, we will be the payer of choice for members and providers, further strengthening our value-based agreements (VBAs).

If you do not already have an Availity Essentials account, register today to start taking advantage of improved pre-authorization turnaround time and reduced administrative burden. Look for more information about our pre-authorization transformation efforts in future issues of this newsletter.

# Pre-authorization updates

| Procedure/medical policy  | Added codes effective March 1, 2022     |
|---|---|
| Evaluating the Utility of Genetic Panels (#GT64)                                  | 81440, 81460, 81465                     |
| Genetic Testing; Primary Mitochondrial Disorders (#GT54)                          | 81401, 81403-80415, 81440, 81460, 81465 |
| Procedure/medical policy  | Added codes effective April 1, 2022     |
| Bioengineered Skin and Soft Tissue Substitutes and Amniotic Products (#MED170)    | A4100                                   |
| Digital Health Products (#MED175)   | A9291                                   |
| Digital Health Products for Attention Deficit Hyperactivity Disorder (#MED175.01) | A9291                                   |
| Digital Health Products for Substance Use Disorders (#MED175.02)                  | A9291                                   |
| Procedure/medical policy  | Adding codes effective June 1, 2022     |
| Wireless Capsule Endoscopy for Gastrointestinal (GI) Disorders (#RAD38)           | 0651T; CPT 91110, 91111, 91113          |

Our complete *Pre-authorization List* is available in the [Pre-authorization](#) section of our provider website. Please review the list for all updates and pre-authorize services accordingly. You can submit standard medical pre-authorizations through Availity Essentials. Learn more on our provider website: [Pre-authorization>Electronic Authorization](#).

## The Bulletin recap

We publish updates to medical policies and reimbursement policies in our monthly publication, *The Bulletin*. You can read issues of *The Bulletin* or subscribe to receive an email notification when issues are published on our provider website: [Library>Bulletins](#).

### Medical policy updates

We provided 90-day notice in the February 2022 issue of *The Bulletin* about changes to our *Hematopoietic Cell Transplantation for Acute Lymphoblastic Leukemia* (#TRA45.36) medical policy, which is effective May 1, 2022.

We provided 90-day notice in the March 2022 issue of *The Bulletin* about the new *Wireless Capsule Endoscopy for Gastrointestinal (GI) Disorders* (RAD#38) medical policy, which is effective June 1, 2022.

The *Medical Policy Manual* includes a list of recent updates and archived policies: [Library>Policies & Guidelines>Medical Policy>Recent Updates](#).

All medical policies are available on our provider website: [Library>Policies & Guidelines](#).

### Reimbursement policy updates

We provided 90-day notice in the February 2022 issue of *The Bulletin* about changes to the *Drugs, Immunizations/ Vaccines, Radiopharmaceuticals, and Skin Substitutes Reimbursed Under Medical Coverage* (Medicine #104) reimbursement policy, which are effective May 1, 2022.

We provided 90-day notice in the March 2022 issue of *The Bulletin* about changes to the *Cellular and Gene Therapy Products* (Medicine #112) reimbursement policy, which is effective June 1, 2022.

Our reimbursement policies are reviewed on an annual basis.

View our *Reimbursement Policy Manual* on our provider website: [Library>Policies & Guidelines>Reimbursement Policy](#).

To see how a claim will pay, access the Clear Claim Connection tool on Availity Essentials: Payer Spaces>Resources>Claims and Payment>Research Procedure Code Edits.

## Reminder: CAM services no longer require pre-authorization

Chiropractic, acupuncture and massage (CAM) services no longer require pre-authorization.

Use Availity Essentials to check whether a service requires pre-authorization.

## Behavioral health corner

### About behavioral health corner

This section highlights the articles that affect behavioral health providers. We also recommend you use the search function (**Ctrl + F**) on your computer to search for keywords that concern your practice.

This newsletter contains the following articles that pertain to behavioral health care.

| Articles in this issue with behavioral health content        | Pages |
|--|-------|
| National Healthcare Decisions Day                            | 1     |
| ABA reimbursement reminder                                   | 7     |
| Some behavioral health cases to require review by phone      | 7     |
| Reminder: Inpatient forms                                    | 7     |
| Telehealth support for post-discharge behavioral health care | 8     |

We also recommend you review the following articles because they often have policy updates that may affect your practice.

| Recurring topics likely to affect your specialty | Pages |
|--|-------|
| Update your directory information                | 3     |
| <i>Administrative Manual</i> updates             | 3     |
| Pre-authorization updates                        | 6     |
| <i>The Bulletin</i> recap                        | 6     |
| Medication policy updates                        | 9-11  |

### ABA reimbursement reminder

Reimbursement rates for applied behavior analysis (ABA) services will change effective May 1, 2022. You can check rates on Availity Essentials: Claims & Payment>Fee Schedule Listing>Fee Schedules.

### Some behavioral health cases to require review by phone

Our behavioral health utilization management team will complete telephonic concurrent and discharge reviews for some services delivered on or after July 1, 2022.

We will require telephonic reviews for cases involving the following member and diagnostic groups:

- Child and adolescent—all levels of care and diagnoses
- Eating disorder—all levels of care
- Residential substance use disorder (SUD)

After a provider submits the inpatient form—required beginning May 1, 2022—our staff will contact the requestor to schedule a review.

#### Improving provider experience and patient outcomes

These types of cases are typically more complex and have more treatment and discharge needs. Discussing these cases by phone allows for thorough conversations in which all relevant clinical information can be provided and all questions answered. Telephonic reviews result in more productive utilization reviews and outcomes.

After processing an initial review, our staff will notify the requestor when the next concurrent or discharge review is due, and a telephonic review can be scheduled. Alternatively, the requestor can call our staff to complete the review the day it is due.

**Excluded:** ABA and transcranial magnetic stimulation (TMS) services are excluded from the telephonic review requirement.

Look for additional information in the June 2022 issue of this newsletter.

### Reminder: Inpatient behavioral health forms

To reduce turnaround times for reviews and approvals, we will require facilities to submit behavioral health intake forms for services rendered May 1, 2022, and later.

The following forms will be required:

- *Initial Request Form* (This form can be attached to new initial pre-authorization requests in Availity Essentials.)
- *Concurrent Request Form*
- *Stepdown Request Form*
- *Discharge Notification Form*

The forms will be posted on our provider website April 4, 2022:

- [Quick Links>Behavioral Health Facilities](#)
- [Library>Forms](#)

### Telehealth support for post-discharge behavioral health care

To improve our members' outcomes and to reduce or avoid readmissions, it is important that patients are seen by a behavioral health provider within seven days of discharge. Telehealth appointments can help meet that need.

**Note:** Discharge appointments do not count as follow-up appointments.

#### Measuring success

The Healthcare Effectiveness Data and Information Set (HEDIS®) measure Follow-Up After Hospitalization for Mental Illness (FUH) tracks post-discharge care. To meet the measure's standard, behavioral health clinicians should provide the following types of services within seven days of discharge:

#### Qualifying provider types

- Psychiatrist
- Licensed clinical social worker (LCSW)
- Licensed marriage and family therapist (LMFT)
- Licensed professional counselor (LPC)
- Psychiatric nurse
- Psychologist

#### Qualifying services

- Intensive outpatient (IOP)
- Partial hospitalization program (PHP)

Read about the FUH measure in the Quality Measures Guide on our provider website: [Programs>Quality>HEDIS Reporting](#).

#### Telehealth options

We encourage you to share the following telehealth options with your patients to help them receive needed post-discharge care.

#### Telehealth providers

- **Talkspace:** Virtual mental health counseling available 24/7/365 via text, audio or video messaging
  - **Contract location:** Across our four-state region
  - [talkspace.com/partnerinsurance](#)
- **Charlie Health:** Mental health virtual intensive outpatient treatment for teens and young adults, as well as their families
  - **Contract location:** Across our four-state region
  - [charliehealth.com](#)

- **NoCD:** Specialized virtual care for obsessive compulsive disorder (OCD) using exposure and response prevention treatment (ERP)
  - **Contract location:** Across our four-state region
  - [treatmyocd.com](#)
- **Eleanor Health:** Addiction and substance use disorder treatment provider with integrated evidence-based virtual outpatient care and recovery for opioid and other substance use disorders
  - **Contract location:** Washington
  - [eleanorhealth.com/locations/washington](#)

#### Learn more about telehealth

Telehealth visits allow members to receive care using a computer, phone and/or tablet.

All of our members have access to expanded telehealth services. In addition, most members have standard telehealth benefits. Learn more about telehealth on our provider website: [COVID-19 Updates & Resources>Telehealth Visits](#).

We continue to add virtual care options to increase access to outpatient professional appointments.

#### Check eligibility and benefits

Check telehealth benefits in Availity Essentials by performing an eligibility and benefits inquiry:

- Select the Professional (Physician) Visit – Office benefit service type (BST).
- Scroll down to Professional (Physician) Visit – Home to view eligibility and benefits results.

You may also need to view the benefit booklet for additional details.

You can view standard telehealth benefits when performing an eligibility and benefits inquiry in Availity Essentials.

# Medication policy updates

Listed below is a summary of medication policy additions and changes. Links to all medication policies, medication lists and pre-authorization information for our members, including real-time deletions from our pre-authorization lists, are available on our provider website: [Programs>Pharmacy](#). **Note:** Policies are available online on the effective date of the addition or change.

**Pre-authorization:** Submit medication pre-authorization requests through [covermymeds.com](#).

**Expert feedback:** We routinely assess our medication policies based on updated medical literature, national treatment guidelines, practicing provider feedback and pharmaceutical market changes. If you'd like to provide feedback or be added to our distribution list, please email us at [BridgeSpanRxMedicationPolicy@bridgespanhealth.com](mailto:BridgeSpanRxMedicationPolicy@bridgespanhealth.com) and indicate your specialty.

**New U.S. Food & Drug Administration- (FDA-) approved medications:** New-to-market medications are subject to pre-authorization based on their FDA-labeled indication, pivotal trial criteria and dosage limitations until we complete a full medication review and develop a coverage policy.

**Product not available (PNA) status:** We allow a 90-day grace period to use any existing supply for medications that CMS has designated as PNA before they become ineligible for reimbursement. See our *Non-Reimbursable Services* (Administrative #107) reimbursement policy on our provider website: [Library>Policies&Guidelines>Reimbursement Policy](#).

| Effective March 1, 2022                           | Description   |
|---|---|
| <b>Revised medication policy</b>                  |   |
| High-cost medications for dry eye disease, dru472 | <ul style="list-style-type: none"> <li>- Added the newly available generic for Restasis single-dose vials to policy</li> <li>- Coverage of the generic is limited to when there is documentation of an intolerance or contraindication to an inactive ingredient in branded Restasis single-dose vials</li> <li>- Restasis multidose-vials are considered not medically necessary and therefore not covered</li> </ul>  |

| <b>Description</b>                                |   |
| <b>New medication policy</b>                      |   |
| Betibeglogene autotemcel, dru698                  | <ul style="list-style-type: none"> <li>- Will limit coverage to patients with transfusion-dependent beta-thalassemia with a non-β0/β0 genotype when standard of care (red blood cell transfusions/iron chelation therapy) has been ineffective and for whom a hematopoietic stem cell transplantation (HSCT) is appropriate, but a matched donor is not available</li> </ul>  |

CONTINUED ON PAGE 10

| <b>New medication policies, continued</b> |  |
|---|--|
| Tivdak, tisotumab vedotin, dru690         | - Will limit coverage as monotherapy for patients with recurrent or metastatic cervical cancer when there has been progression of disease on or after at least one prior chemotherapy doublet and, if the tumor expressed PD-L1 (CPS > 1), pembrolizumab unless contraindicated or not tolerated |
| Vyvgart, efgartigimod alfa, dru696        | - Will limit coverage to patients with AChR-antibody positive generalized Myasthenia Gravis with severe disease when managed by a specialist and lower cost therapies were ineffective or not tolerated  |
| Xipere, triamcinolone, dru702             | - Will limit coverage to when lower cost forms of corticosteroids were ineffective, including oral, ophthalmic drops and injectable Triesence  |

| <b>Revised medication policies</b> |  |
|------------------------------------|--|
| Complement Inhibitors, dru385      | - Adding Tavneos (avacopan) to policy<br>- Will limit coverage to patients with severe active ANCA-AV as adjunctive therapy with standard of care including glucocorticoids, when managed by a specialist and previous standard of care therapies (rituximab, cyclophosphamide, glucocorticoids, MTX, AZA and MMF) were ineffective at inducing or maintaining remission |
| Keytruda, pembrolizumab, dru367    | - Will add coverage criteria for early TNBC in the neoadjuvant/adjuvant treatment setting; this indication was previously considered not medically necessary   |
| Opdivo, nivolumab, dru390          | - Will add coverage criteria for the use of Opdivo for urothelial carcinoma in the adjuvant setting for patients at high risk of recurrence, a newly FDA-approved indication   |
| Tecentriq, atezolizumab, dru463    | - Will add coverage criteria for the use of Tecentriq for early non-small-cell lung cancer (NSCLC) in the adjuvant setting, a newly FDA-approved indication  |

**Effective June 1, 2022****Description**

| <b>New medication policy</b>                          |  |
|---|--|
| Besremi, ropeginterferon alfa-2b-NJFT, dru703         | - Will limit coverage to patients with polycythemia vera when hydroxyurea and peginterferon alfa-2a have not been effective  |
| Exkivity, mobocertinib, dru686                        | - Will limit coverage to patients with advanced NSCLC when there has been progression of disease on or after front-line therapy with cytotoxic chemotherapy when the tumor harbors an EGFR exon 20 insertion mutation; use in the front-line setting is considered investigational   |
| Ileal Bile Acid Transporter (IBAT) Inhibitors, dru699 | - Will limit coverage of odeixibat (Bylvay) to patients with pruritis due to progressive familial intrahepatic cholestasis when standard therapies have been ineffective<br>- Will limit coverage of maralixibat (Livmarli) to patients with Alagille syndrome when diagnosed by a specialist with genetic confirmation, when standard therapies have been ineffective, and activities of daily living (ADLs) are affected |
| PCSK9 Inhibitors, dru697                              | - New combination policy replacing individual policies for Praluent and Repatha (dru406 and dru407)<br>- Will add newly FDA-approved product, Leqvio (inclisiran), to policy   |
| Rezurock, belumosudil, dru684                         | - Will limit coverage to patients with chronic GVHD after autologous bone marrow transplant (BMT) or HSCT when at least two prior cGVHD therapies have failed or were not tolerated  |

| <b>New medication policies, continued</b>               |  |
|---|--|
| Scemblix, asciminib, dru692                             | - Will limit coverage to patients with Ph+ CML after at least two prior tyrosine kinase inhibitors (TKIs) (in alignment with labeling), or when there is documentation of a T315I mutation and ponatinib was ineffective, was not tolerated, or is contraindicated (aligned with label plus step therapy with a lower-cost alternative)  |
| Welireg, belzutifan, dru685                             | - Will limit coverage to a specific subset of VHL-associated tumors (RCC, CNS hemangioblastomas, and pNETs) when the disease is not metastatic, and tumors do not require immediate resection  |
| <b>Revised medication policies</b>                      |  |
| Brukinsa, zanubrutinib, dru691                          | - Will move to new combination policy: Bruton's tyrosine kinase (BTK) inhibitors, dru691<br>- Will add coverage criteria for Waldenstrom's macroglobulinemia (WM) and marginal zone lymphoma (MZL), two newly FDA-approved indications   |
| cabozantinib-containing medications, dru290             | - Will add coverage for use of Cabometyx in differentiated thyroid cancer (DTC), a newly FDA-approved indication   |
| CDK4/6 Inhibitors for Breast Cancer                     | - Will add coverage criteria for Verzenio (abemaciclib) as adjuvant therapy for early breast cancer (BC), a newly FDA-approved indication  |
| Copiktra, duvelisib, dru573                             | - Will move to new combination policy: PI3K Inhibitors, dru706<br>- Will remove coverage criteria for follicular b-cell non-Hodgkin lymphoma (FL); indication withdrawn by the FDA   |
| High-cost medications for dry eye disease, dru472       | - Will add newly FDA-approved Tyrvaya (varenicline solution) nasal spray to policy   |
| Istodax, romidepsin, dru198                             | - Will move to new combination policy: Medications for T-cell lymphoma, dru705<br>- Will remove coverage criteria for peripheral t-cell lymphoma (PTCL); indication withdrawn by the FDA   |
| Jakafi, ruxolitinib, dru268                             | - Will add coverage criteria for chronic GVHD, a newly FDA-approved indication   |
| Medications for pulmonary arterial hypertension, dru633 | - Will remove treprostinil injection (generic Remodulin) from policy; this product will no longer require pre-authorization<br>- Will add step therapy requirements with generic bosentan and generic ambrisentan to Adempas, Orenitram, and Uptravi when used for WHO Group 1 pulmonary arterial hypertension<br>- Will add intravenous Uptravi to policy; its use will be considered not medically necessary and therefore not covered |
| metyrosine (generics, Demser), dru405                   | - Will revise step therapy criteria to include dihydropyridine calcium channel blockers  |
| Sodium oxybate-containing medications, dru093           | - Will add coverage criteria for Xywav for idiopathic hypersomnia, a newly FDA-approved indication   |
| Tibsovo, ivosidenib, dru558                             | - Will add coverage criteria for relapsed or refractory IDH1-mutated cholangiocarcinoma (CCA), a newly FDA-approved indication   |
| Zydelig, idelalisib, dru363                             | - Will move to new combination policy: PI3K Inhibitors, dru706<br>- Will remove coverage criteria for FL and small lymphocytic lymphoma (SLL); indications withdrawn by the FDA  |

| Archived medication policies                |  |
|---|--|
| everolimus-containing-medications, dru178   | - Afinitor products will no longer require pre-authorization |
| Sutent, sunitinib, dru128                   | - Sutent will no longer require pre-authorization            |
| Effective July 1, 2022                      | Description  |
| Archived medication policies                |  |
| High-Cost Epinephrine Autoinjectors, dru484 | - Auvi-Q will no longer require pre-authorization            |

## Cancer screenings

An estimated 30% to 50% of all cancers are preventable. According to the Centers for Disease Control and Prevention (CDC), cancer is the second leading cause of death in the U.S. Your patients may have avoided cancer screenings during the COVID-19 pandemic and may be overdue for them.

We cover a variety of preventive services at no cost (no copay and no deductible) to our members. Preventive services can help detect the following cancers before symptoms appear and when treatment is more likely to be successful.

### Screening coverage for members

- Breast cancer prevention counseling (if high risk) and screening mammogram (ages 40+ or at high risk)
- Cervical cancer screening (Pap) (ages 21+)
- Colon cancer screening (ages 45+)
- Lung cancer (ages 50-80 with history of smoking)
- Skin cancer counseling (ages 6 months-24 years for those with fair skin type)

### Member reminders

Eligible members are receiving opt-in texts asking whether they agree to receive preventive screening reminders. If the member agrees, they will receive a text message reminding

them of the importance of the screening and that they might be due to schedule theirs. The text will also include a link to an educational video about the importance of the missing screening.

The member can respond to the text with a request for help scheduling an appointment, which will trigger a call from a BridgeSpan care advocate. The text also allows the member to indicate barriers preventing them from being screened, which a care advocate can help address.

### Preventive vs. diagnostic care

When scheduling appointments, please remind your patients that during the preventive care visit if diagnostic care is needed to treat a new symptom or an existing problem, cost share (e.g., copay, coinsurance or deductible) amounts may apply for these additional services.

### View our preventive care list

View the complete list of preventive services that we cover in English and Spanish, listed by members of all ages, pregnant members and children: [bridgespanhealth.com/member/use/preventive-care-list](https://bridgespanhealth.com/member/use/preventive-care-list). Flyers about breast cancer, colorectal cancer and cervical cancer screenings to share with your patients are available on our provider website: [Products>Networks](#).
