Drug Exclusions with Alternatives

The medications listed below are excluded from coverage because lower cost similar alternatives are available. To help you get the best health benefit at the lowest cost, consider talking with your doctor about one of the therapeutically equivalent (similar safety and efficacy) or over-the-counter (OTC) alternatives listed below. We encourage you to talk to your doctor about whether one of these options is right for you. Coverage of alternatives will vary.

These excluded medications may be considered medically necessary when ALL of the alternatives in the table below have been ineffective, not tolerated or all are contraindicated, unless otherwise specified. If your doctor believes that the listed alternatives are not right for you, your doctor may request an exception by contacting Customer Service. Please visit your health plan's website or contact Customer Service at the number listed on the back of your member ID card for more information about medication coverage.
