

OCTOBER 2022

Provider News

For participating physicians, dentists, other health care professionals and facilities

October is National Breast Cancer Awareness Month

National Breast Cancer Awareness Month raises awareness about the importance of early detection of breast cancer. Breast cancer is the most common cancer in women, and on average, women have a 1-in-8 chance of developing breast cancer during their lifetime. October is a great time to call attention to the actions women can take to detect breast cancer early.

As a health care provider, you are a patient's trusted resource and can encourage women to be informed and actively engage in the health care decisions that affect them, such as getting screened for breast cancer and obtaining other recommended preventive services. The U.S. Preventive Services Task Force (USPSTF) recommends that women ages 50 to 74 have a screening mammogram every two years. Women ages 40 to 49 should talk with their provider about when to begin screening and how often to get a mammogram.

Some women are at higher risk for breast cancer and should discuss with their doctor when and how often to receive mammograms. The Centers for Disease Control and Prevention (CDC) website provides helpful resources for patients regarding risk factors.

Most of our health plans include benefits for screening mammograms at no cost for women 40 and older when an in-network provider is selected.

About Provider News

This publication includes important news, as well as notices we are contractually required to communicate to you, including updates to our policies (medical, dental, reimbursement, medication) and pre-authorization lists. In the table of contents, this symbol indicates articles that include critical updates: ■. To save you time, you can click on the titles to go directly to specific articles. You can also return to the table of contents from any page by clicking on the link at the bottom of each page.

Provider News includes information for BridgeSpan Health in Idaho, Oregon, Utah and Washington. When information does not apply to all four states, the article will identify the state(s) to which that specific information applies.

Issues are published on the first day of the following months: February, April, June, August, October and December.

The information in this newsletter does not guarantee coverage. Verify members' eligibility and benefits via Availity Essentials at **availity.com**.

The Bulletin

We publish a monthly bulletin as a supplement to this bimonthly provider newsletter. *The Bulletin* provides you with updates to medical and reimbursement policies, including changes we are contractually required to communicate to you.

Share your feedback

If you have additional comments about our newsletter or bulletin, please send us an email at **provider_communications@bridgespanhealth.com**.

Editor's note (updated December 1, 2022): Information about our cardiology program originally appeared below in the incorrect *Administrative Manual* section.

Administrative Manual updates

The following updates were made to our manual sections on October 1, 2022:

Facility Guidelines

- Added behavioral health information
- Added facility-specific utilization management information from the Medical Management section
- Removed 24-hour admission notification exceptions for holidays and weekends effective January 1, 2023
- Added information about our *Surgical Site of Service – Hospital Outpatient* (#UM19) medical policy

Medical Management

- Added introductory content
- Simplified program information
- Added information about new cardiology utilization program
- Removed facility-specific utilization management information

Our manual sections are available on our provider website: [Library>Administrative Manual](#).

SNF audits begin in 2023

For services delivered on or after January 1, 2023, we will conduct post-payment review of skilled nursing facility (SNF) claims for pricing and payment accuracy.

Our vendor, Performant, will contact your office if your claim is selected for review:

- To validate the services billed on the claim
- To verify the pricing method applied is correct
- To verify the payment rendered is appropriate to the member's plan of benefits

If you disagree with Performant's findings, you can appeal to Performant. Their contact information is provided on the determination letter. We will request recoupment via adjustment of a future claim payment.

Independent laboratories and billing place of service

As a reminder, there are claim submission guidelines for independent laboratories billing for tests on samples drawn at a place of service (POS) outside of their facility. The POS is defined as where the sample was drawn; the POS must be included on claims.

POS codes for samples drawn on individuals who are inpatient or outpatient at a hospital are:

- Inpatient (POS 21)
- Off-campus outpatient hospital (POS 19)
- On-campus (POS 22)

An independent laboratory taking a sample in its own laboratory would reflect POS 81 on the claim.

For more information, refer to the Centers for Medicare & Medicaid Services (CMS) Claims Processing Manual 26.10.6, available at [cms.gov/regulations-and-guidance/guidance/manuals/downloads/clm104c26pdf.pdf](https://www.cms.gov/regulations-and-guidance/guidance/manuals/downloads/clm104c26pdf.pdf). These guidelines are also available in the Laboratory section of our *Administrative Manual* on our provider website: [Library>Administrative Manual](#).

Hearing aid reimbursement update

In May 2022, we increased reimbursement rates for hearing aids. The May 1, 2022, reimbursement change applies to all plans, regardless of benefit limits. **Note:** This clarification supersedes previous hearing aid-related communications.

If a member chooses to upgrade to a hearing aid product above the fee schedule, the member should complete a *Non-Covered Services Member Consent Form*.

To verify a member's benefit amount, check Availability Essentials.

Advantages of using CPT Category II codes

CPT Category II (CPT II) codes are supplemental tracking codes intended to facilitate data collection about care quality. CPT II codes describe components that are typically included in an evaluation and management (E&M) service or test results that are part of the laboratory test or procedure. They provide more information about the care your patient received during a visit.

Why you should use CPT II codes

Submitting CPT II codes will:

- Share clinical data using claims
- Allow providers with value-based agreements (VBAs) to provide more complete data to us
- Improve the data used for performance measurement, such as Healthcare Effectiveness Data and Information Set (HEDIS®) reporting
- Decrease the volume of record abstraction and chart review, which reduces the administrative burden on providers
- Simplify gap closure for many of our Quality Incentive Program (QIP) measures

If you use the Care Gap Management Application (CGMA) to track your QIP performance, CPT II codes provide an automated method for closing many gaps.

Resources

Our *Quality Measures Guide* is helpful for understanding which CPT II codes can help support performance measurement data and gap closure and is available in the CGMA or on our provider website: [Programs>Quality>HEDIS Reporting](#).

We encourage you to use CPT II codes whenever possible to improve efficiency for quality reporting.

Update your directory information

Accurate provider directories are essential to help members find providers who best meet their health care needs and individual preferences. When information is missing or inaccurate, members may be denied care or receive unexpected medical bills.

The Consolidated Appropriations Act (CAA), 2021, requires health plans to establish a process to verify and update provider directory information no less frequently than every 90 days. Accurate provider directories are also a requirement for compliance with CMS.

Our *Provider Directory Attestation Requirements for Providers* policy requires:

- Providers to review for accuracy and submit all updated information about their practice at least every 90 days
- Providers to continue to notify us promptly of changes to directory information
- All participating providers who are eligible (based on their specialty and current credentialing status) be listed in our directories
- All participating providers to comply with our policies and procedures related to furnishing information necessary to ensure provider directories are up-to-date, accurate and complete pursuant to federal and state law, including 45 C.F.R. 156.230(b); this information includes, but is not limited to, accepting new patients, provider practice location, contact information, specialty, medical group and other institutional affiliations
- Providers to review, update and return roster validation requests

Please follow the instructions to verify your directory information on our provider website at least every 90 days: [Contact Us>Update Your Information](#).

As part of your routine review of provider directory information, also review your National Provider Identifier (NPI) data in CMS' National Plan & Provider Enumeration System (NPPES). Visit NPPES help for more information: nppes.cms.hhs.gov/webhelp/.

DRGs based on claims data

As a reminder, a provider's contract dictates the Medicare Severity Diagnosis Related Group (MS-DRG) version used to process their inpatient hospital claims. A provider's grouper version is not revised when CMS releases a new version.

ICD-10 codes are specific to each grouper version. When an ICD-10 code outside a provider's grouper version is billed, it is mapped to an ICD-10 code that is part of the grouper version in the provider's agreement. We use software based on CMS' software specifications to map these codes.

DRGs are assigned based on data submitted on a claim, including the following:

- Patient's age and gender
- Diagnosis and present on admission (POA) indicator
- ICD-10-CM codes
- Admission date
- Discharge status
- Bill type

Using those data, the grouper assigns a DRG based on the grouper version in the provider's agreement. The DRG grouping is based on the admission date.

For additional information about the claims data used to assign a DRG, view the *Facility DRG Validation* (Facility #111) reimbursement policy on our provider website: [Library>Policies & Guidelines>Reimbursement Policy](#).

New edit on chiropractic code

CPT 98943 edit: Effective January 1, 2023, we will add a ClaimsXten edit to limit CPT 98943 (chiropractic manipulation of one or more of the extra-spinal regions) to one unit per date of service. Additional units will be denied.

Responding to documentation requests

When medical records or supporting documentation are needed for claims processing, we request them through Availity's Attachments application, fax, email or USPS. We are increasing the number of requests sent through Availity Essentials. If you receive a request for medical records, please respond using the same format in which the request is received. If you receive a request via Availity, you must submit requested records using the Attachments application.

To avoid claim-processing delays, please set up access to the Availity Attachments application today. This will ensure you receive notification and can submit documentation when requested.

The Attachments application allows fast, easy and secure transmission of supporting documentation. You can also view the status and history of submitted records in the attachments dashboard and can message us directly from the application if you have questions.

Getting set up for the Availity Attachments application is easy. Your organization's Availity administrator can assign the medical attachments role to users who need access to Attachments—New. Learn more about setup and using the application in the Getting Started Guide on Availity Essentials: Help & Training>Get Trained, then search for Attachments—New.

Notes

- Do not submit medical records with a claim unless indicated on the *Clinical Edits by Code List* on our provider website: [Claims & Payment>Coding Toolkit](#).
- If medical records are required to process your claim, we will send you a request.
- Sending unsolicited attachments can delay the processing of your claim. Only use the Attachments application to submit documentation when you receive a notification in your Availity Essentials work queue.

Learn more

Find on-demand and live training options or download a Getting Started Guide on Availity Essentials: Help & Training>Get Trained, then search for Attachments—New.

Editor's note (updated December 20, 2022): The cardiology program code list originally published included an incorrect code range. The corrected codes are noted in red.

Pre-authorization updates

Procedure/medical policy	Added codes effective September 1, 2022
Charged-Particle (Proton) Radiotherapy (#MED49)	77301, 77338
Procedure/medical policy	Added codes effective October 1, 2022
Expanded Molecular Testing of Cancers to Select Targeted Therapies (#GT83)	0334U
Procedure/medical policy	Adding codes effective November 1, 2022
Surgical Site of Service—Hospital Outpatient (#UM19)	43235, 43237-43239, 43242, 43245-43251, 43254, 45378-45381, 45384-45386, 45390, 45398
Procedure/medical policy	Adding codes effective December 1, 2022
Definitive Lower Limb Prosthesis (#DME18)	L5610, L5611, L5613, L5614, L5616, L5700-L5703, L5710-L5712, L5714, L5716, L5718, L5722, L5724, L5726, L5728, L5780, L5810-L5812, L5814, L5816, L5818, L5822, L5824, L5826, L5828, L5830, L5840, L5848, L5856-L5858, L5930, L5970, L5972, L5974, L5976, L5978, L5979-L5982, L5984-L5987
Procedure/medical policy	Adding codes effective January 1, 2023
AIM Specialty Health (AIM) Cardiology	37220, 37221, 37224-37231, 92920, 92924, 92928, 92933, 92937, 92943, 93454-93461, 93880, 93882, 93922-93926, 93930, 93931, 93978, 93979

Our complete *Pre-authorization List* is available in the [Pre-authorization](#) section of our provider website. Please review the list for all updates and pre-authorize services accordingly.

You can submit standard medical pre-authorizations through Availity Essentials. Learn more on our provider website: [Pre-authorization>Electronic Authorization](#).

Holiday and weekend notification exceptions to be removed

We have previously allowed more than 24 hours for hospital and inpatient hospice to notify us of admissions and discharges that occur on a holiday or weekend. We are removing these exceptions effective January 1, 2023. This change will align our 24-hour notification requirement across facility types.

Continue to submit notifications as you do today.

The notification period exemptions will be removed from our pre-authorization list.

NICU/PICU form streamlines admission notification

We require notification of all neonatal intensive care unit (NICU) and pediatric intensive care unit (PICU) admissions within 24 hours. Providers should use our *NICU/PICU Notification of Admission Form*, which will help streamline the authorization process for both BridgeSpan and providers.

The form is available on the [Pre-authorization](#) section of our provider website.

Cardiac program to launch in 2023

We are launching a cardiology program to review outpatient cardiovascular tests and procedures. The program will require pre-service medical necessity review through AIM for cardiac services delivered on or after January 1, 2023.

AIM will administer the program, which works to improve health care quality and manage costs for the most complex and prevalent tests and treatments, helping to promote care that is appropriate, safe and affordable.

Exclusions: Procedures performed in an inpatient setting or on an emergent basis are not subject to this program's pre-authorization requirements.

For services delivered before January 1, 2023

For services that currently require pre-authorization and will be delivered before January 1, 2023, continue to submit pre-authorization requests as you currently do.

For services delivered on or after January 1, 2023

Beginning December 19, 2022, providers will be able to contact AIM for pre-authorization of services to be performed on or after January 1, 2023, using one of the following methods:

- **Online:** The AIM ProviderPortal is available 24/7 and processes requests in real-time using clinical criteria, providerportal.com.
- **By phone:** Call AIM at (877) 291-0509, Monday through Friday, 8 a.m.-5 p.m. (PT).

If a provider does not verify that a pre-authorization request has been approved before performing an outpatient cardiac service, the claim will be reviewed post-service and may deny as provider responsibility.

Contact AIM to obtain an authorization number for the following non-emergency cardiac services:

- Diagnostic coronary angiography with or without right or left heart catheterization
- Arterial duplex
- Physiologic study arterial
- Percutaneous coronary intervention, such as coronary stents and balloon angioplasty and atherectomies; post-service review will be performed within 10 days of the service

Note: These cardiograph services currently require pre-authorization as part of our radiology program; please continue to contact AIM for pre-authorization of these services before and after January 1, 2023.

- Stress echocardiography (SE)
- Resting echocardiography (TTE)
- Transesophageal echocardiography (TEE)

Register today

Before submitting a request, providers need to register an account for AIM's ProviderPortal: providerportal.com.

Resources and training

AIM has resources to help your practice get started with the cardiology program with useful information and tools, such as checklists and clinical guidelines: aimprovider.com/cardiology.

AIM will offer webinars and Q&A sessions before the program launches for providers and office staff to learn more about the program and how to use the AIM ProviderPortal. Sessions will cover:

- How the program and pre-authorization request process work
- Which members and services will require pre-authorization
- A demonstration of the AIM ProviderPortal and how to enter requests

Once you register for training, you will be able to view training content. Reviewing the material before the training can help your facility identify questions to ask during the session. Recordings will also be available before January 1, 2023, for registered ProviderPortal users.

Look for more information on our provider website in November 2022 and in the December 2022 issue of this newsletter.

Related: See *Pre-authorization updates* on page 6.

Gastrointestinal procedures at hospitals to require pre-authorization

Reminder: Effective November 1, 2022, select gastrointestinal procedures (e.g., endoscopy, colonoscopy) performed at a hospital outpatient surgical site will require pre-authorization for the site of service.

Under our new *Surgical Site of Service–Hospital Outpatient* (#UM19) medical policy, we will require pre-authorization for the following codes when performed at a hospital outpatient place of service:

- **Colonoscopy:** CPT 45378-45381, 45384-45386, 45390 and 45398
- **Endoscopy:** CPT 43235-43239, 43242, 43245-43251 and 43254

These services will not require pre-authorization when performed at an ambulatory surgical center (ASC) or physician office.

Important date: Providers can request pre-authorization for these services beginning October 7, 2022. If faxing the pre-authorization request, providers should include an attestation form, available on our Pre-authorization list.

We consider an individual's health status, facility and geographic availability, specialty requirements, physician privileges and other factors when determining the appropriate site of service.

Note: In addition to the site of service, the services performed may require pre-authorization; check the [Pre-authorization list](#) on our provider website.

These policies were announced in the August 1, 2022, issue of *The Bulletin*, available on our provider website: [Library>Bulletins](#).

For more information, view the medical policy on our provider website: [Library>Policies & Guidelines>Medical Policy](#).

The Bulletin recap

We publish updates to medical policies and reimbursement policies in our monthly publication, *The Bulletin*. You can read issues of *The Bulletin* or subscribe to receive an email notification when issues are published on our provider website: [Library>Bulletins](#).

Medical policy updates

We provided 90-day notice in the August 2022 issue of *The Bulletin* about the following medical policies, which are effective November 1, 2022:

- *Hypoglossal Nerve Stimulation* (#SUR215)
- *Surgical Site of Service – Hospital Outpatient* (#UM19)
 - **Related:** See *Gastrointestinal procedures at hospitals to require pre-authorization* on page 8.

We provided 90-day notice in the September 2022 issue of *The Bulletin* about the following medical policies, which are effective December 1, 2022:

- *Definitive Lower Limb Protheses* (#DME18)
- *Pectus Excavatum and Carinatum Surgery* (#SUR12.02)

The *Medical Policy Manual* includes a list of recent updates and archived policies: [Library>Policies & Guidelines>Medical Policy>Recent Updates](#).

All medical policies are available on our provider website: [Library>Policies & Guidelines](#).

Reimbursement policy updates

We provided 90-day notice in the August 2022 issue of *The Bulletin* about changes to the *Drugs, Immunizations/ Vaccines, Radiopharmaceuticals, and Skin Substitutes Reimbursed Under Medical Coverage* (Medicine #104) reimbursement policy, which is effective November 1, 2022.

Our reimbursement policies are reviewed on an annual basis.

View our *Reimbursement Policy Manual* on our provider website: [Library>Policies & Guidelines>Reimbursement Policy](#).

To see how a claim will pay, access the Clear Claim Connection tool on Availity Essentials: [Payer Spaces>Resources>Claims and Payment>Research Procedure Code Edits](#).

Medication policy updates

Listed below is a summary of medication policy additions and changes. Links to all medication policies, medication lists and pre-authorization information for our members, including real-time deletions from our pre-authorization lists, are available on our provider website: [Programs>Pharmacy](#). **Note:** Policies are available online on the effective date of the addition or change.

Pre-authorization: Submit medication pre-authorization requests through covermymeds.com.

Expert feedback: We routinely assess our medication policies based on updated medical literature, national treatment guidelines, practicing provider feedback and pharmaceutical market changes. If you'd like to provide feedback or be added to our distribution list, please email us at BridgeSpanRxMedicationPolicy@bridgespanhealth.com and indicate your specialty.

New U.S. Food & Drug Administration- (FDA-) approved medications: New-to-market medications are subject to pre-authorization based on their FDA-labeled indication, pivotal trial criteria and dosage limitations until we complete a full medication review and develop a coverage policy.

Product not available (PNA) status: We allow a 90-day grace period to use any existing supply for medications that CMS has designated as PNA before they become ineligible for reimbursement. See our *Non-Reimbursable Services* (Administrative #107) reimbursement policy on our provider website: [Library>Policies & Guidelines>Reimbursement Policy](#).

Effective October 1, 2022	Description
Revised policy	
Drugs for chronic inflammatory diseases, dru444	<ul style="list-style-type: none"> - Added Skyrizi as a level 1 self-administered and provider-administered option for Crohn's disease - Olumiant for COVID-19 is considered not medically necessary when used in the outpatient setting - Olumiant for alopecia areata is considered cosmetic per contract definitions - Updated Rinvoq and Xeljanz/Xeljanz XR ulcerative colitis criteria to require Humira step therapy (vs. Humira or Stelara) - Updated Cimzia Crohn's disease self-administration criteria to require two level 1 therapies (vs. one)
Effective October 15, 2022	Description
Revised policy	
Intravitreal Vascular Endothelial Growth Factor (VEGF) Inhibitors, dru621	<ul style="list-style-type: none"> - Adding Cimerli (ranibizumab-eqrn) as a level 2 product
Effective December 1, 2022	Description
Revised policies	
Tropomyosin receptor tyrosine kinase (TRK) inhibitors, dru724	<ul style="list-style-type: none"> - New combination policy replacing individual policies for Rozlytrek and Vitrakvi (dru610 and dru583) - Adding step therapy requirement with Rozlytrek before Vitrakvi
BRAF Inhibitors, dru728	<ul style="list-style-type: none"> - New combination policy replacing individual policies for Tafinlar and Zelboraf (dru308 and dru266) - Adding coverage criteria for BRAF-mutated solid tumors with reported sensitivity to Tafinlar (dabrafenib)/Mekinist (trametinib), a new FDA-approved indication

CONTINUED ON PAGE 10

Effective December 1, 2022	Description
Revised policies continued	
Mitogen-activate dextracellular signal-regulated kinase (MEK) Inhibitors, dru727	<ul style="list-style-type: none"> - New combination policy replacing individual policies for Mekinist, Mektovi and Cotellic (dru307, dru556 and dru442) - Adding coverage criteria for BRAF-mutated solid tumors with reported sensitivity to Tafinlar (dabrafenib)/Mekinist (trametinib), a new FDA-approved indication
Effective January 1, 2023	
Revised policies	
Non-Preferred Intra-Articular Hyaluronic Acid Derivatives, dru351	<ul style="list-style-type: none"> - Changing preferred products to Synvisc, Synvisc One and Orthovisc; these products will not require pre-authorization - Moving Euflexxa to non-preferred; current utilizers may finish the current course; ongoing coverage beyond their current course will require pre-authorization
Complement Inhibitors, dru385	<ul style="list-style-type: none"> - Adding additional step therapy requirements for coverage of Soliris - The following additional products will need to be ineffective, not tolerated or contraindicated for consideration of Soliris coverage: <ul style="list-style-type: none"> • Paroxysmal nocturnal hemoglobinuria (PNH): Ultomiris and Empaveli. • Atypical hemolytic uremic syndrome (aHUS): Ultomiris • Refractory myasthenia gravis (MG): Ultomiris and Vyvgart • Neuromyelitis Optica Spectrum Disorder (NMOSD): Enspryng and Uplizna - Existing utilizers will not be impacted
Non-preferred pegfilgrastim products, dru563	<ul style="list-style-type: none"> - Changing preferred products to Fulphila and Ziextenzo; these products will not require pre-authorization - Current utilizers of Udenyca will need to change to a preferred product or obtain pre-authorization for ongoing coverage - We will share more information about this change in the December 2022 issue of this newsletter
Follistim AQ, follitropin beta, dru731	<ul style="list-style-type: none"> - For members with fertility treatment coverage, Follistim AQ will require pre-authorization - The preferred product, Gonal-F, will not require pre-authorization
Acthar H.P. Gel, repository corticotropin injection, dru316	<ul style="list-style-type: none"> - Moving coverage from medical benefit to pharmacy benefit regardless of self- or provider-administration

Reviewing medications with members

One important role of a PCP is being an information resource regarding all the medications their patients take. Our members often take several medicines, vitamins and supplements from different sources. They face the risk of duplicate therapy or potentially adverse interactions if they have multiple prescribers.

By reviewing all of the patient's medications during their visits, the PCP can identify potentially duplicate or dangerous combinations of medicines. We know that many of these reviews do occur.

To facilitate memorable conversations about medications, many offices ask members to bring all their medications to their next visit, including vitamins, supplements, herbal remedies and other products they are taking for their health needs.

During that visit, the PCP, a nurse or pharmacist can:

- Review the medications
- Identify any concerns with the medications
- Make sure the patient understands each product's purpose
- Make sure the patient is taking them as prescribed

Using techniques like the teach-back method—as well as reviewing any medication changes again at the end of an office visit and highlighting changes on an after-visit summary—are great ways to help patients remember having had a conversation.

Educational handouts and flyers are another great way to help patients remember conversations about their medications. Handouts and flyers can also help PCPs and staff facilitate these conversations. We have several flyers that address medication management available in English or Spanish:

- *Your Health: Tips for Taking Medications Safely*
- *Your Health: Staying Safe When You Take Several Medications*
- *Your Health: Questions to Ask About Your Medicines* (This flyer includes space for a patient to list their medications, including the dose and frequency. If the patient completed this form in advance or in the waiting room, it could provide a starting point for a conversation about the medications.)

If you'd like a copy of these flyers, please send an email to Quality@bridgespanhealth.com.

Clinical Practice Guidelines updates

Clinical Practice Guidelines are systematically developed statements on medical and behavioral health practices that help physicians and other health care professionals make decisions about appropriate health care for specific conditions.

We renewed the following Clinical Practice Guidelines, effective September 1, 2022:

- *Identification, Evaluation, and Treatment of Overweight and Obesity in Adults*
 - Continue to recommend the Veterans Affairs/ Department of Defense (VA/DOD) guidelines as a comprehensive evidence-based guideline, with minor changes to the title, hyperlink and year for the most recent edition
- *Management of Chronic Noncancer Pain with Opioids in Adults*
 - Continue to recommend the Health and Human Services (HHS) treatment improvement protocol (TIP) publication as a comprehensive evidence-based guideline
- *Screening and Management of Substance Use Disorders in Adults*
 - Continue to recommend the VA/DOD guidelines as a comprehensive evidence-based guideline
 - Updated the U.S. Preventive Services Task Force (USPSTF) guideline in the Other Resources section

View the guidelines on our provider website: [Library> Policies & Guidelines>Clinical Practice Guidelines](#).

2023 products and networks

Our product portfolio will include exclusive provider organization (EPO) products in Oregon, Utah and Washington. EPO members only have in-network benefits and members will be responsible for 100% of out-of-network costs except:

- Out-of-network emergency room, ambulance services and urgent care will be covered at the in-network benefit level. Urgent care services may be subject to balance billing.
- When traveling out of our service area, urgent care, emergency room and ambulance services are covered with no balance billing if the member sees a participating MultiPlan provider.

The open enrollment period for individuals seeking coverage beginning on January 1, 2023, is from November 1, 2022, through January 15, 2023. Individuals may qualify for special enrollment periods outside of this period if they experience certain life events.

Members whose plans are being discontinued have received notice from us about options available to them in 2023.

Provider network and product areas

RealValue Network:

- Supports on-exchange members in Oregon, Utah and Washington and members who travel to Idaho
- **Idaho network area:** Ada, Bannock, Benewah, Bingham, Boise, Bonner, Bonneville, Boundary, Canyon, Clearwater, Gem, Idaho, Jefferson, Kootenai, Latah, Lewis, Nez Perce, Owyhee, Payette, Shoshone, Valley and Washington counties
- **Oregon network service and sales area:** Statewide
- **Utah network service and sales area:** Box Elder, Cache, Carbon, Daggett, Davis, Duchesne, Emery, Juab, Morgan, Rich, Salt Lake, Summit, Tooele, Uintah, Utah and Weber counties
- **Washington network service area:** Benton, Clark, Columbia, Franklin, King, Kitsap, Klickitat, Pierce, Skagit, Snohomish, Spokane, Thurston, Walla Walla, and Yakima counties; **Sales area:** Benton, Clark, Columbia, Franklin, King, Kitsap, Klickitat, Pierce, Skagit, Snohomish, Spokane, Thurston, Walla Walla and Yakima counties

Benefit highlights

- **Note:** This is not a comprehensive list of benefit or changes, and some benefits are only available on specific plans.
- Members will have access to either telephone or chat nurse triage lines (depending on their plan), available 24/7.
- The mobile urgent service DispatchHealth, **dispatchhealth.com**, will be available to treat common to complex injuries and illnesses at the member's home. It is available to members in the following areas: Boise, Idaho; Portland, Oregon; and Seattle, Tacoma, Spokane and Olympia, Washington.
- Bump2Baby will be available to support members with information and resources during and after pregnancy.
- Members who have specific chronic conditions will have access to expanded preventive care.
- To help manage the cost of medications for chronic conditions, members will pay less before the deductible for prescription medications on the *Optimum Value Medication List*.
- Pediatric vision is embedded in all of our plans for members 18 and younger. Pediatric dental will be included on plans in Oregon and Utah.

Verify network participation

Verify your network participation and find other in-network providers using the provider directory, Find a Doctor tool, on our website.

Verify eligibility and benefits

You can verify your patients' eligibility and benefits on Availability Essentials.

More information

Information about our 2023 products will be available in the Products and Networks section of our provider website in January 2023.

Behavioral health corner

About behavioral health corner

This section highlights the articles that affect behavioral health providers. We also recommend you use the search function (**Ctrl + F**) on your computer to search for keywords that concern your practice.

Articles in this issue with behavioral health content	Page
Reminder: Reimbursement changes	13
Diagnosing and treating depression in primary care	14-15
SAD could affect your patients this winter	15

We also recommend you review the following articles because they often have policy updates that may affect your practice.

Recurring topics likely to affect your specialty	Page
<i>Administrative Manual</i> updates	3
Update your directory information	4
Pre-authorization updates	6
<i>The Bulletin</i> recap	8
Medication policy updates	9-10

Reminder: Reimbursement changes

We revised reimbursement for the following codes and licensing types for providers on our standard agreements effective October 1, 2022:

- CPT 90837 (psychotherapy) for psychiatrists, psychologists and master's-level clinicians
- Licensing differential adjustments for master's-level clinicians
- Payable alcohol and drug treatment services (ADTS) codes across our markets, including rate adjustments

The updated rates will be available on Availity Essentials this month.

Diagnosing and treating depression in primary care

Most behavioral health treatment is provided in the primary care setting, and proper mental health and substance use treatment are integral to a person's overall health.

Depressive disorders are the number one cause of disability and the most common types of mental health conditions. Depression can often go unrecognized by others—even by those afflicted. It also increases risk for other medical illness by 40%.

In the U.S., rates of depression skyrocketed across age groups during the COVID-19 pandemic, with one in three American adults reporting symptoms in 2021. Some estimates put that figure as high as 40%. Youth have had an even greater increased prevalence of depression, with teenage girls showing the highest rates. Thus, screening for depression across age groups is critical, as is pursuing additional assessment and treatment for positive screens.

Routine depression screenings in the primary care setting are considered a best practice for intervention and treatment. Patients may feel more comfortable with their PCP, with whom they have an established relationship, rather than seeking help from a behavioral health provider. Additionally, those suffering may not seek treatment because they don't recognize their symptoms or don't want to acknowledge them. Fortunately, many primary care groups have integrated licensed behavioral health professionals who can take "warm handoffs" to begin further assessment and initial treatment without needing an outside referral.

Recognize risk factors

- Being female
- History of trauma
- Having alcohol use disorder
- Death or loss of a loved one
- Low income, financial instability
- Being pregnant or recently giving birth
- Having a personal and/or family history of depression
- Having comorbid chronic medical conditions, including chronic pain

Some common signs and symptoms

- Loss of motivation
- Weight gain or loss
- Decreased concentration
- Fatigue or lack of energy
- Neglecting responsibilities
- Unexplained aches and pains
- Sleeping too much or too little
- Loss of interest in personal appearance
- Psychological symptoms
 - Anger, anxiety, sadness, irritability, mood swings, lack of emotional responsiveness, feelings of worthlessness or helplessness and, in the extreme, thoughts of suicide or self-harm

Resources for PCPs

The behavioral health toolkit on our provider website is designed to support PCPs: [Behavioral Health > Behavioral Health Toolkit](#). It includes an extensive list of screening tools, including the *Patient Health Questionnaire 9 (PHQ-9)*, which can be used to screen for and diagnose depression. The PHQ-9 is both highly sensitive and specific for depression. It can be used to measure the severity of depression, as well as response to treatment.

The toolkit also includes a presentation titled *Depression: Screening and treatment in the primary care setting*.

In addition to addressing depression, our toolkit includes resources for treating members who may have the following diagnoses and challenges:

- Anxiety
- Alcohol use
- Attention-deficit/hyperactivity disorder (ADHD)
- Bipolar disorder
- Eating disorders
- Gender identity
- Opiate use
- Pain management
- Post-traumatic stress disorder (PTSD)
- Substance use disorder
- Suicide prevention

The toolkit also includes information about our care management services, including case management, as well as information to help PCPs determine the best path forward in the early stages of a patient's evaluation and treatment.

Knowing when to refer

PCPs should consider psychiatric consultation prior to treatment in the following circumstances:

- Imminent risk of suicide—call 911 immediately
- Need for hospitalization
- Uncertainty about the diagnosis
- Comorbid psychiatric disorders

Resources for you

Use our [Self-Service Tool](#), available 24/7, to review helpful answers to our most frequently asked questions and quickly navigate our provider website resources.

SAD could affect your patients this winter

As the days get shorter and the winter months settle in, some of your patients may start to experience symptoms of seasonal affective disorder (SAD).

SAD is a type of depression that most often occurs during the winter season, and it is thought to be caused by a lack of sunlight. The signs and symptoms of SAD can mirror those of depression and can include:

- Oversleeping
- Having low energy
- Overeating and weight gain
- Feeling sluggish or agitated
- Having difficulty concentrating
- Restlessness and agitation, among others

SAD can be treated using traditional forms of care, such as psychotherapy and antidepressant medication, and may also benefit from light therapy and vitamin D supplements. To help identify SAD in your patients:

- Ask about mental health issues during the patient's physical exam.
- Check for symptoms of depression by asking about symptoms and the patient's thoughts, feelings and behavior patterns.
- Consider using a diagnostic tool, such as the *Seasonal Pattern Assessment Questionnaire* or the *PHQ-9* quick depression assessment.

Healthwise's Knowledgebase has helpful information about SAD. Access their site and materials in English and Spanish at [healthwise.net/bridgespan](https://www.healthwise.net/bridgespan).
