

ASURIS ADVICE24

## 24/7 advice your employees can count on

The price of outpatient care keeps going up. And some costly treatments, like ER visits for nonemergency care, are avoidable. Also, postponing needed treatment can make symptoms worse and cost more. That's why Asuris Advice24 is here to help your employees make the right care decision at the right time.

**Asuris Advice24 is not insurance, but is offered in addition to your medical plan to help your employees get information and support when they need it.**

### Expert advice day and night

Your employees and their covered family members can contact Asuris Advice24 for around-the-clock support and guidance. Members can call toll-free or use chat on [asuris.com](https://www.asuris.com) or the Asuris app. Registered nurses can assess symptoms and help employees choose emergency care, a doctor appointment or self-care.

Registered nurses will provide referrals based on plan benefits and direct members to low-cost, convenient virtual care when appropriate. Depending on the situation, nurses will follow up with members to ensure they received the care and guidance needed.

### Healthy employees are good for your business

Asuris Advice24 puts professional health care advice into your employees' hands at any time, day or night. Talking to a caring professional calms fears, clears up confusion and provides the peace of mind that comes from knowing what to do. As a result, employees seek the right care at the right time, reduce sick days and avoid unnecessary outpatient care. That's a good use of health care benefits—and good news for your bottom line.
