

we need **BETTER**

We need better addiction care for our communities, for our loved ones, for ourselves. This care must be human, and focused on the individual needs of each person who comes to us for assistance. This care must be based in science and the understanding that addiction is a disease that requires medical, behavioral, and social support.

Eleanor Health is on your side. We deliver a whole-person, personalized approach to treatment and recovery to help you succeed.

we need it **NOW**

We need this care fast, so that there are open doors when a loved one asks for help on their journey of recovery. This door must stay open and welcoming, even in the face of a difficult disease and relapse. This door must open to points of care in clinics, and extend outside of the clinic walls into the community.

our services

Medication

Evidence-based, integrated approach that includes individually-appropriate medications for addiction and other psychiatric needs, such as Suboxone and antidepressants, as part of a personalized plan for recovery.

Therapy

Group and individual therapy in clinic, through video, and in community settings, tailored to what is most effective and convenient.

Resources

Dedicated support to remove individual barriers to recovery and a fulfilling life through connection to resources such as housing, employment, and peer support.

Virtual Care

Full suite of services can be delivered through secure video visits, providing timely and convenient care.

recovery. for life.

Comprehensive addiction treatment includes:

- Medication-assisted treatment, including for opioid use disorders
- Psychiatric evaluation and medication management
- Individual and group therapy
- Community-based recovery partners
