

# 100-day prescription medication supply

Asuris Medicare Advantage members who have pharmacy benefits with their medical plan are eligible to receive up to a 100-day supply of medications that treat chronic conditions or maintenance medications for the same copay as a 90-day supply.

## Help your patients control costs

Even if your patient already receives a 90-day supply, switching them to a 100-day supply gives them 10 more days of medication and could save them money. **Note:** Copays can vary depending on benefit with the greatest savings using preferred retail and home delivery pharmacies.

## Better medication adherence improves Medicare Star Rating performance

Prescribing a 100-day supply can improve Medicare Star Ratings performance for adherence-related measures (e.g., statins, hypertension or oral diabetes medications):

- If a member has three 90-day supply fills in a year, they are not adherent for these measures.
- If a member has three 100-day supply fills in a year, they are adherent for these measures.

## It's easy to switch

Patients can get up to a 100-day supply at the same locations they were getting their 90-day supply. Contact your patient's pharmacy with a new prescription for a 100-day supply for their statins, hypertension and oral diabetes medications.

Patients can also get a 100-day supply through a home delivery pharmacy or participating retail pharmacy in our extended supply network (ESN). Use Amazon Pharmacy to get preferred mail-order savings and the convenience of home delivery.
